

Core Rules Document — Prompt Maker v2.0

A stable, universal rule system that governs how every prompt is generated, regardless of style, subject, or text mode.

Pillar 1 — Core Image Structure

Defines the universal physics of the system. These rules never change.

1. Subject Rules

- Subject must be clear and concrete.
- Optional setting may be included.
- Optional mood may be included.
- Subject must not contain style instructions.

2. Scene Composition Rules

- Foreground subject is always the focus.
- Background environment must support the subject.
- Props may be included if relevant.
- Action or pose must be clearly described.

3. Lighting Rules

- Neutral baseline lighting.
- Style packs may override lighting behavior.
- No random lighting drift.

4. Color Rules

- Neutral baseline palette.
- Style packs define palette behavior.
- No uncontrolled saturation or hue shifts.

5. Variation Levels (Mandatory)

Every prompt must generate three variations:

Variation	Description
Realistic	Grounded, photographic, natural.
Stylized	Enhanced, expressive, artistic.
Full Crazy	Exaggerated, viral, chaotic.

These three levels are required for every output.

Pillar 2 — Text Styling & Placement

Defines how text behaves across all styles.

Text Styling Options

- Bold Meme Block
- Soft Wholesome
- Chaotic Burst
- Vintage Noir
- Corporate Parody

Text Texture Options

- Clean
- Grainy
- Neon Glow
- Chalky
- Glossy
- Comic Halftone

Text Placement Options

- Top
- Center
- Bottom
- Split (top + bottom)
- Floating (style-dependent)

Text Rule

If **Image** + **Text** is selected:

- Text must match style tone.
- Text must fit subject.
- Text must follow placement rules.
- No drift.

Pillar 3 — Style Pack System

Style packs are modular and define how a style behaves.

Style Pack Template

```
# STYLE PACK: [Name]

## Core Aesthetic
Describe the visual identity.

## Lighting Behavior
How light behaves in this style.

## Color Behavior
Palette, saturation, contrast.

## Texture Behavior
Smooth, grainy, neon, plush, clay, etc.

## Motion Behavior
Streaks, blur, chaos, stillness.

## Caption Tone
How text should sound.

## Transformation Rules
### Realistic
How realism behaves.

### Stylized
How stylization behaves.

### Full Crazy
How chaos behaves.
```

Example Outputs

- Realistic:
- Stylized:
- Full Crazy:

Pillar 4 — Output Formatting

Defines how final content is structured.

Output Structure

Each generation produces:

- Three windows:
- Realistic
- Stylized
- Full Crazy
- Copy-ready text
- No commentary
- No drift
- Consistent formatting

PDF Workflow

1. Write prompt in Markdown.
2. Export to PDF.
3. Use on phone.

Purpose of Core Rules

- Ensure consistency.
 - Prevent drift.
 - Maintain predictable outputs.
 - Support unlimited style expansion.
 - Keep system modular and stable.
-

Future Expansion

- Additional style packs.
 - Text tone library.
 - Favorites system.
 - Super Randomizer Mode.
 - Advanced caption behaviors.
-

This Core Rules Document defines the stable foundation of Prompt Maker v2.0 and supports all future style packs, text systems, and output formats.
